MESSAGE FROM OUR SCHOOL HEAD:

Dear Sage College Families,

There is no greater responsibility than to impact someone's life! At Sage College we are aware that sharing 8 hours a day throughout an entire school year creates a very special bond between one another. That is why both students, teachers and the rest of the Sage community enjoy the ordinary and extraordinary activities that contribute to the development of our students. This week we have been able to see how through art and music we have had enriching experiences in a pedagogical concert for everyone. In addition, visits and excursions continue to occur after a year in which they have been limited and for this reason they take on a special value that we all live with great enthusiasm. We are closer to the summer break, where there will be time to rest, to attend summer camps and to refill our batteries for the next year. If we have overcome this very complex year, from now on we will be stronger in the future, more prepared and aware that if we all work together to overcome a challenge, together we can succeed. I am very proud of our Sage Community!

Mr Wickham

-EARLY YEARS NEWS-

Little Duckings

The little ducklings started their new topic 'Water' this week and we started our first week by looking at 'Rain' and 'Rainbows'. On Wednesday the children came to school prepared for a Big Paint Rainbow session, which the children loved! To start the session we talked about all the colours of the rainbow and sang the song, 'I can see a rainbow...'. Next week we will be looking at 'The Sea'.

Friendly Frogs

The Friendly Frogs have brought some plants for our garden and they are learning how to take care of them by watering them and cleaning their leaves with cotton and water one by one. This Montessori inspired activity lets them develop their patience and the need to be gentle and caring with living things that surround us!

Busy Bees

This week, the Busy Bees have been learning about addition through playing games. First, they counted their numicon necklace. Then they found a peer to make the addition by adding both numicon necklaces together. Then they wrote their addition. Great work Busy Bees!

MATHS

In KS1 Primary, we are working on our topic of 'Money'. In Year 1 this week we have been paying particular attention on how to use different coins to make different amounts and adding amounts together.

In Year 2 we have been concentrating on how to calculate change from a bigger amount.

This week in Yr 6 we are learning about probability. Children have learnt vocabulary related to it such as impossible, unlikely, likely or certain chances that something will happen. To understand the concept better, they carried out an investigation by rolling a dice. How likely it is to be a 3 if you roll the dice 12 times?

ESPAÑOL YEAR 1

This week Year 1 has been working in their creative writing through story writing. They have created their own character and their adventures developing their imagination. Once they finished they shared their work with the class, developing as well the oracy and entonation Amazing work class!

Year 5 are parents!

We have been learning all about life cycles in science and year 5 decided they wanted to be parents.

Don't panic - they have become parents to baby bean plants! We each have a beautiful baby to watch grow in our classrooms. It's very exciting and we can't wait to see our baby beans start to germinate.

Here they are on our windows.

- MIDDLE SCHOOL NEWS -

ADVERTS IN YEAR 9

As part of their unit on Persuasive Writing, Year 9 students have completed a project for their English class in which they had to pick a product, service or place and create an advert to promote it, using a slogan and all the persuasive techniques and devices they have learned in class. Some of the products they have presented include mobile phones, smart watches, holiday resorts or bicycles.

Sage music school and pedagogical concert

Our students had the opportunity to attend a wonderful Music Concert offered by the Sage Music Academy teachers. They learned how the different instruments are used and could enjoy listening to several pieces of music. Finally, some students wanted to join the performance by singing some songs. Without doubt it was a day to remember.

NEXT WEEK, KS3 STUDENTS WILL BE ABLE TO PARTICIPATE IN THE FIRST TABLE-TENNIS COMPETITION AT SAGE. DO NOT FORGET TO SIGN UP FOR IT!

-HIGH SCHOOL NEWS-

CONGRATULATIONS TO STUDENTS

Our High School students make a great effort and show a great commitment to get good results and reach their goals and dreams. This allows them to continue opening doors to their future. We feel really proud of how they work. One important aspect at school is to reward our students and congratulate them when they are successful. This also let them be good models for the younger students at school.

This week, our Year 13 student Alberto Sinigaglia, who is the Sage College Head Boy, has been accepted in Flight Training Europe (FTE). In this way, Alberto is nearer his dream: becoming a pilot. Moreover, his results during the admission tests were so brilliant that he could be directly recommended by FTE to join an airline. We celebrate this success and congratulate him and his family. Well done!

Our Year 11 student, Jimena Llordén Romero-Valdespino has got a High Achievement Award by Cambridge Assessment International Education for her high result in IGCSE German last year. This means that she got one of the highest results worldwide in the syllabus during the examination series. We would like to congratulate her and her family on this achievement. Congratulations!

BENEFITS OF MUSIC

Music has clear benefits in different areas. It also contributes to the development of important skills. All this implies a clear positive effect on learning.

For that reason, we would like to encourage our students to enjoy listening to and playing music.

This week, our High School students had the opportunity to attend a music event organised by our Sage College Music Academy teachers. During the event, students learnt the characteristics of different instruments and enjoyed different music performances.

THIS WEEK...

Ms Gómez

ABOUT ME...

Hello everyone! My name is Maria Jose, but people call me MJ or Mary.

I was born in Cadiz. I did my master's degree on English Studies. Specialised in Linguistics. After University, I worked in a language school, but after a while I decided to explore the world, so I moved to London with my daughter. As a single mum, it was a bit challenging, but it gave me the opportunity to live and work in a multicultural city. Travelling to many places became a way of life. I worked there for 7 years teaching in both primary and secondary. I definitely learnt a lot about the British system and many other cultural traditions. It was such an enriching experience! I came back a couple of years ago to open my own language school. Now I work at Sage College, my little 'Britain' in Cadiz. I can't think of a better place to be. It feels the same, but with much better weather!

HOBBIES AND PASSIONS...

After school, you will find me working out. I'm a gym geek and 'a bit' competitive. I also like swimming. My swimming record is 3k in an hour! At the weekend, I like hanging with my dog on the beach, hiking, skiing when possible, and hopefully one day travelling again! I also like painting and playing the Spanish guitar.

DON'T FORGET TO FOLLOW US!
