## Our extracurricular activities have started!!

This week our extracurricular activities program has started. We have a wide range of activities on offer such as Dance and Sports, Music School, Academy and English Language School..

## Dates to remember

- Local Holiday  
**Monday 11th October**
- Día de la Hispanidad  
**Tuesday 12th October**
- Early Years: Flamenco Workshop  
**Thursday 14th October**

## MESSAGE FROM OUR SCHOOL HEAD:

Our students spend an average of 8 hours a day at school every day. Every single moment of the day at school must be part of their education and development as human beings. In addition to learning mathematical concepts, acquiring cultural and historical knowledge and learning to read and write in English or Spanish, as teachers we know of the importance of the development of the character of our students. The psychosocial aspects of the learning process in the school must be very present in the curricular and non-curricular proposals. That is why we give so much importance to Workshops and Clubs in addition to extracurricular activities. Water safety and swimming, the importance of learning to take care of the environment in the Gardening Club or the benefits of music for our children are examples of unseen treasures that transform, not only the body or the mind but the soul and will provide them with tools that will accompany them the rest of their lives. At Sage College, our commitment is that as they leave the school and step into adult life, they have a huge range of possibilities and options before them. We seek excellence, diversity and will introduce them into a path full of possibilities through the competencies acquired in the years as Sagers!

Mr. Wickham

# -EARLY YEARS NEWS-

## Bussy Bees

This week the Busy Bees have been exploring colours. They listened to the story "The White Rabbit Colour Book". They have been predicting what would happen when two colours are mixed together. Then they mixed the colours to discover the new colours.

Now they are having lots of fun making their very own colours.

# -PRIMARY NEWS-

## WAS THAT YOUR PHONE RINGING MRS RODDICK?

Year 4 have been learning about Alexander Graham Bell this week. They have researched using Kiddle search engine in ICT, they used that research in their English lessons, to create an informative recount about the life of Alexander Graham Bell. In Science the children found out how sound travels. They did this by making string telephones using different materials for the cable.

Not only have they been learning about communication this week. Year 4 have also been experimenting with colours.

Mum's and Dad's keep an eye on your mobiles. They may be painted in the primary colours next week

## IS THERE COMMUNICATION?

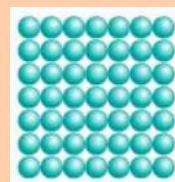

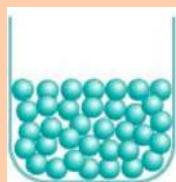

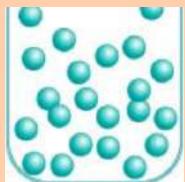

The students of the Y4 language class are working on the elements of communication. They have gone crazy and have shown us that there can be communication between people verbally (oral and written) and non-verbally (gestures, sounds)...

With a single gesture, look at the one you have formed.

# -MIDDLE SCHOOL NEWS-

## Modelling

Year 7 students have been getting out of the classroom to enhance their learning. 7J have been modelling how particles behave in the different states of matter, and linking that knowledge to understand why states of matter have their properties. Here you can see students arranging themselves as solid particles, liquid particles and gas particles respectively.

## WORLD TEACHER'S DAY

This week we celebrated World Teacher's Day. Students showed us how much they appreciate the hard work teachers do every day by delivering chocolates to them. What a lovely sign of respect - this shows us how students are developing holistically as respectful individuals as well as academically excellent students..

### Student Voice:

*'I appreciate the hard work they do for us and how they help us to get better at everything we do'*

*'I appreciate the time they give us and to help us to be open minded, and make us feel like a family'*

# -HIGH SCHOOL NEWS-

## WORKSHOPS

Workshops are an important part of the curriculum of our students. They contribute to enrich the curriculum, which is very valuable for their future and when applying to universities. There are a variety of workshops like radio workshop, different projects in collaboration with universities and companies, NGO, reading, Model United Nations, study skills, among others. For instance, in study skills, Year 11 students completed mind maps based on their future aspirations. In reading workshops, students read and learnt how to analyse the information contained in the books..

## SAGERS *around the world!*

## INTERVIEW!

### - Name

Carla Muñoz Romero.

### - When did you finish at Sage College?

June 2021.

### - How long have you been at Sage College for?

13 years.. From Year 1 to Year 13.

### - Current course and university

I am studying Law and Criminology at CEU San Pablo University.

### - What would you highlight about Sage College?

The varied and practical methodology of teaching. My course is really demanding regarding autonomy and reasoning. Sage College helps you to solve the problems that appear in daily life, giving you the needed abilities for that.

### - How do you think that Sage College helped you to reach your goals?

The motivation to never give up, no matter the given circumstances. Teachers always help you to constantly improve and they do take care of you. They help you to continue growing.

### - Which are your intentions for the future?

I would like to go USA because I like how they work in the area of criminology. After that, I would like to work for a company in the area of financial and tax law.

# MEET OUR STAFF

THIS WEEK... **Mr Guest**

## ABOUT ME...

My passion for teaching came about not long after I completed my Masters in Psychology at Kingston University. I took my PGCE in my local primary school in Devon and quickly realised I could combine teaching with my love for traveling and moved to Madrid to teach at St George's British School. The lure of the sun, sea, beach and surf was too much though and I decided to leave the hustle and bustle of Madrid to start a new chapter of my life down here in the Province of Cadiz.

## HOBBIES AND PASSIONS...

One of my main passions in life is sport. I love all kinds of sport from Cricket to Rugby to Badminton. I am looking forward to improving my rusty surfing skills with Cadiz's famous waves and I will try my hand at windsurfing sooner rather than later. Finally, I am in the unfortunate position of being a lifelong Tottenham Hotspur fan. So, if you ever see me looking a little glum- now you know why!
