Valentines's Day Celebration!!

Last Tuesday we celebrated Valentine's Day with a special lunch and a disco at lunchtime. Our Sagers took advantage of the day to show their affection for each other by making beautiful handicrafts and cards with loving messages.

MESSAGE FROM OUR SCHOOL HEAD

This week I heard a phrase that has been echoing in my head since then. It was said by my friend and psychologist Sara Ruiz in one of her talks at school and she said that **"the education of our children is summed up in love and limits"**.

This week, when we celebrate love, this phrase takes on a special meaning as it could be transferred not only to the education of children but to society in general. Only if we are able to learn as a society to love each other and to know the limits of what we should and should not do will we be able to be better, prosper and develop as a society. To this end, schools, teachers and families are essential agents to represent that reality so in need of love and limits.

Sometimes, the pupil or child will not understand the reason for the decisions we make at home or in the classroom, but it is essentially a learning and a modelling process of the reality they will face in the future, a future society that will have to face challenges that we do not yet know, that have not yet been invented.

Love and limits, two words that together have a very powerful value and that as educators we must keep in mind every day to accompany our students in the challenges they will face in the future.

-EARLY YEARS NEWS-

Developing the Gross Motor skills through play Scooters and bikes are fun!

This week the **Dinky Ducklings** went out to our Sport Court to have a lot of fun.

They brought their **scooters, bikes and tricycles** from home and we use them as a very good way to develop their Gross motor skills making races and playing different games. These types of activities are really important for children of this age to practice as they help them to promote the **brain development, provide an avenue for energy release, boost their ability to assess risk, follow instructions and relieve their stress and frustration among others.**

Join us in the celebration of

Día de Andalucía

24 Feb. Palm Trees Patio

A hundred years of Lola Flores

Programme for families

14:00- Doors opening

- Andalusian tapas for all families
- Food stalls run by Y7-Y11 students

Year 4 Investigating local habitats

In Year 4 we have been studying **living things and their habitats** as our science topic for the last few weeks. This has been a really popular topic with the children and we have been able to take advantage of the different habitats near to our school. As well as searching for and recording invertebrates, we have also been studying the **threats to local habitats** and what we can do to mitigate them, something many of the children feel very passionate about!

Handball in PE & New Sports in Sage! Refining our tactical skills

This term we have been developing our **skills in Handball**. We have been paying close attention to teamwork and tactical team play. Our young learners have been learning how to organize themselves in team positions and see the rewards that organization and teamwork brings!

After we complete our study through Handball, I will be introducing a new sport to the school. The game of **Tchoukball** was invented in the 1960's in Switzerland and has been slowly growing over Europe in recent years. Although similar to Handball there are many differences and this will be a test of our students ability to use transferable skills, but also to adapt to new situations.

REVISING

Learning by doing

The **Year 11 Travel and Tourism** students have created **mega mind maps** for each of the 5 units of content they have to know for the IGCSE exam. By doing this they have actively revised and they have also worked very well in teams; they have even let out their creative selves. We are very proud of their progress from the beginning of year 10 to now and we commend them for it. Well done Year 11s!

SHAPING THE FUTURE

University talk

Corrine introduced the **Swiss Education Group** and their numerous campuses where you can specialise in **Hotel Management, Hospitality and also Business**. Students then engaged in a Workshop where in groups they had to **create a Themed Hotel utilising the Marketing Mix** and considering customer engagement. Students then presented their Hotel idea to the attendees.

TRIP TO CÁDIZ

Changing the learning environment

Year 11 students participated in a **trip to Cádiz**. There, they learnt more about the **culture and history of the city**. Trips are a fantastic opportunity for students to learn about different things in a nice way, and also, a good moment to increase and improve the teamwork and social relationships in the group.

Day at the Races

Lights Out at Jerez international Race Track

On Sunday, the boarders got into a racing spirit at the **GT Winter Series Event held at Jerez's Angel Nieto Racetrack.**

Great GT racing, Formula 4 and raceside food, enjoyed under the beautiful Jerez, winter sun, left the speed bug strong amongst our boarders.

By the end of day, we had decided that the MotoGP in April was definitely a must and we can't wait to return.

And when it got a bit much, Vincent even found a good spot for a sleep between races!
